JULY 6, 2000

To Whom It May Concern:

On numerous occasions over the past 3½ years, our precinct has been using the product ECS 3000. It has proven itself to be an innovative and reliable soil stabilizer.

With over 25 miles of processed road in which ECS 3000 was used, these roads were heavily traveled by not only automobiles, but also mobile homes, trash trucks, and construction vehicles. This product has proven itself to be the cutting edge of soil stabilization.

We would recommend ECS 3000 to anyone considering a soil stabilization product.

Also worth mentioning is that the tax savings are 80%.

Jim Faver  
Supervisor, Precinct 3  
Johnson County, Texas
